

Group C& D

What are existing capacity gaps in the use of GI for DRM?

1

2

who is we

- ITC
- UNU
- UN
- centers of expertise

3

who are the stakeholders

- professionals in DM
 - varies according to hazard
 - district
 - national
- NGOs
- humanitarian assistance community
- National disaster management agencies
- people on the ground
- local structures
 - national universities
 - use teacher's training for dissemination
 - mapping agencies

4

who are the stakeholders (2)

- stratification
 - providers
 - users
 - beneficiaries

5

stakeholder capacities

- are not in the room

6

CB tailoring to specific needs

- we need to know who is responsible (per country)

7

who will provide CB

- universities
- mapping agencies
- regional centers of expertise
- dedicated national institutions

8

cover all relevant aspects of DRM

- no - only parts

9

different stakeholders for different DRM phases

- yes

10

different GI

- yes
- needs to be answered in PhD research

11

spatial data collectors

- some stakeholders in the DRM process should collect spatial data

12

capacity development from individuals to institutions

- needs champions
- institutional development should be strengthened

13

General observations

- need a close link between science and decision making
- gap: we actually do not know what the beneficiaries need
- we are not part of the national DRM process
