

Break-out session 25 September Group A

What are successful delivery modes for improving CB? What can be improved?
Are we reaching all relevant stakeholders?

Participants

- NGI
- MapAction
- ADPC
- Representative from Caucasus
- GRIP
- EUMETSAT
- ITC

- What is the aim of the CB?
- What is successful CB?
- How do we measure success?

- Learning by doing
 - Exercises
 - Case studies
 - Following the whole process

- Long term applications
- Train on models shown working

- Who are the targets? We cannot reach all stakeholders
- Need to address the limitations in a realistic way (the best is the enemy of the good)
- Need for flexibility and participatory process (local involvement already in planning)

Two types of systems

1. Political
2. Administrative
3. Risk assessment level
4. Emergency

1. Producers
2. Users
3. Beneficiaries
