

BOOSTING ECOSYSTEM SERVICES IN RURAL LANDSCAPES: PERSPECTIVES ON ACTIONS AND EVIDENCE

Fabrice DeClerck, Louise Willemen

TEEB AgF brainstorm call

- Commodity ag vs mosaic landscapes
- Health impact
- Economic valuation

- How to get involved in TEEB?
- How to create a community of practice?
- What is the evidence?
- Theory of Change (science to real change; instruments and tools for governance)

ES in Rural landscapes session

What can we learn from actions aiming at minimizing trade-offs between land uses and exploring opportunities for synergies to improve overall benefits, and synthesize their evidence of impact in rural landscapes

Session topics

- Research tools that have proven to be successful in guiding multi-objective decision-making that minimizing trade-offs between land uses and exploring opportunities for synergies to improve overall benefits
- Evidence of how communities, private sector, governments, can be actively engaged in integrated landscape management for ecosystem services in rural landscapes
- Lessons learned and needed action for partnership organizations aiming at putting ecosystems for work for a food secure and sustainable future

Morning programme

10:00	S. Hussein	Introduction to TEEB for Food and Agriculture
	Presentations TEEBAgF studies	Luke Brander, Alistair McVittie, Salman Hussein, and Fabrice DeClerck
12:30	Closure	

Afternoon programme

13:30	F. DeClerck L. Willemen,	Introduction to boosting ecosystem services in rural landscapes: perspectives on actions and evidence
13:45	F. V. Boeraeve	Rural landscape design: think local and involve locals
14:00	L. Bremer	Ecosystem services and socio-ecological resilience under land use and climate change in Kona, Hawaii
14:15	R. Jezeer	Agroforestry coffee plantations in Peru- a double dividend for biodiversity and farmers?
14:30	S. Larson	Evaluating ecosystem services provided through conservation easements.
14:45	K. Paudyal	Indicators of biodiversity and ecosystem services in community forestry: insights from Nepal
15:00	Break	
15:15	S. Foli	The contribution of forests and trees to food production in the tropics: a systematic review
15:30	V. Nangia	Agricultural water management and ecosystem services in the Aral-Syrdarya watershed,
15:45	B. de Knegt	Hotspots for nature based solutions, a case study for a more sustainable agriculture in the Netherlands
16:00		Plenary Discussion
16:45	Closure	
17:00-	L. Mannetti	Expanding the PA network Namibia: institutional development for rangeland management surrounding Etosha National Park
18:30	B. de Knegt	Hotspots for nature based solutions, a case study for a more sustainable agriculture in the Netherlands

Reporting back

- What new insights came out of the workshop?
- What are the plans for the next year?
