

The European Commission's science and knowledge service

Joint Research Centre

Global/Regional updated and historical baseline data on population and built-up areas

Thomas Kemper

Human Planet Forum, Enschede, 14/09/2017

What is it about?

- provide a platform for **information exchange** and **collaboration** on production of **global/regional built-up** and **population** data including:
 - Archived, **historic** data
 - Recent data for **monitoring**
 - Spatial & temporal integration of data

What do we want to do?

- Develop joint experiments (and scientific publications)
 - Cross-comparison of data sets
 - Benchmarking of algorithms
 - Integration of different data sets
 - Spatial resolution
 - Temporal resolution (timeseries)
 - New data products
 - ...

Who should come?

- Everybody interested in the topic
 - Data owners of large image archives
 - Producers of settlement and population data
 - Image processing experts
 - Population modellers
